

ABDULLAH SAUAFTH

.NET Backend Developer

Jordan | [[phone](#)] | [abdullahsauafth@gmail.com] | [[LinkedIn](#)] | [[GitHub](#)] | [[Portfolio](#)]

PROFESSIONAL SUMMARY

42 Amman Core Curriculum graduate focused on backend development with C# and ASP.NET Core. Completed the full 42 Core in 15 months and built production and systems-level projects spanning REST APIs, authentication, relational databases, Docker, HTTP networking, Unix processes, and low-level programming.

TECHNICAL SKILLS

Languages: C#, C++, C

Backend: ASP.NET Core, REST APIs, Entity Framework Core, JWT Authentication, Authorization

Databases: PostgreSQL, SQL Server

Tools & Platforms: Docker, Git, Linux

Concepts: OOP, Dependency Injection, Clean Architecture, HTTP, Networking, Testing

PROJECTS

Tempo — Production Gym Management Platform | C#, ASP.NET Core, PostgreSQL, Docker

- Developed the backend of a production gym-management platform currently used by one gym.
- Built RESTful APIs, authentication and authorization, database-backed business workflows, and backend services for core gym operations.
- Collaborated in a 5-person team and contributed to deploying the production system on AWS.

Webserv — HTTP Server | C++

- Built an HTTP server from scratch in C++, implementing socket-based networking, request parsing, routing, configuration handling, CGI execution, and HTTP response generation.
- Worked with non-blocking I/O, connection lifecycle management, error handling, and HTTP protocol behavior.

Minishell — Unix Shell | C

- Built a Bash-like shell in C with command parsing and execution, pipes, redirections, environment variables, signals, and built-ins.
 - Used Unix processes, file descriptors, fork/exec, pipes, and signal handling to implement shell behavior.
-

EDUCATION & TRAINING

42 Amman — Web Development Specialization

Sep 2026 – Present

- Currently pursuing the post-Core Web Development specialization.
- Focused on advanced web development and backend engineering.

42 Amman — Core Curriculum | Jun 2025 – Sep 2026

- Completed the full 42 Core Curriculum in 15 months.
 - Intensive peer-based software engineering program covering algorithms, C/C++, Unix systems programming, concurrency, networking, HTTP, containers, and full-stack development.
-

ACHIEVEMENTS

- 2nd Place — [[CAVT Hackathon](#)], [2026]
- Built interactive [[2D map](#)] and [[3D map](#)] for the 42 Amman campus.
